Comment

I Am not satisfied that there will be enough water to service this proposed reactor due to our severe recent drought and ~~water~~ associated water evaporation. In the broader picture, I am concerned with nuclear power production related to uranium mining and the high-level nuclear waste production + storage. Catastrophic consequences of nuclear reactor failure come to mind i.e. Chernobyl + Three mile Island. Why not spend the money on conservation + appropriate alternative energy and invest in a safe future for our children + grandchildren? It seems that we in the South have been targeted for more than our fair share of new + proposed nuclear reactors. This is not a legacy I want to leave for my grandchildren.

Thanks for this opportunity to comment.

let's rethink A nuclear future,

Judith Hallock

Scoping comments should be postmarked no later than July 2, 2010.

Please fold on the dotted lines with Business Reply side out, tape the bottom, and mail back to the NRC.

This image shows a single page of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There is no handwriting or other markings on the paper.
