**Subject:** Please complete BC report by 10

Luis has a principal staff meeting scheduled for 1030 and I would like to get this out by then. This is what I have thus far. Please let me know of anything that needs to go in the cover page.

### 1.) Significant accomplishments/activities this week:

- Conducted end-of-cycle meetings. ~~delete~~
- Region II held further discussions in anticipation of issuing a confirmatory action letter to FPL for issues associated with degradation of boraflex in the Turkey Pt unit 3 spent fuel pool. ~~delete~~
- Continued development of Choice Letter for a Hatch greater than green finding related to failure of electrolytic capacitors. ~~delete~~
- Oconee inspectors followed up on a report of tritium identified in a deep well located within the licensee's owner controlled property. The licensee issued a press release. ~~delete~~

### 2.) Significant activities planned for next week:

- R. Musser is conducting a benchmarking trip in RIV. ~~delete~~

### 3.) Site Coverage/qualifications or training issues/Inspector Pass-Alongs:

- None ~~delete~~

### 4.) SPO Letter input:

- Robert Nelson, Deputy Director, NRR Division of Operating Reactor Licensing (DORL) and his Technical Assistant, Sean Meighan, provided excellent support for a visit to NRR by a RII resident inspector. The visit was to better familiarize the RI with the various duties and processes associated with the licensing process and to expose the RI to the diversity of issues discussed at the Executive team (ET) and Leadership Team (LT) levels. Prior to the visit, Robert arranged a number of activities including: events briefings to the ET; Petition Review Board (PRB) and overview of the 10 CFR 2.206 petition process; relief request reviews with a licensee; Legacy System and Enterprise Project Management overview; NOED lessons learned meeting; Operating Events screening meeting; tour of the Operations Center, ACRS, ASLB, and other important HQ locations; meetings with NRR LT and ET to include a Significant Topics Brief on the Aggregate Impact of licensing actions on licensees; a review of HQ involvement in international programs; NRR FY2011 budget planning and preparation meeting; DORL discussion on inspection methods to confirm licensee actions committed to per NFPA 805; and a DORL branch meeting. In addition, Robert discussed the licensing process in detail. As a result of this visit, the RI is much more aware of the various and diverse NRR processes and better understands where and when to interact with NRR. This detailed and involved visit enhanced not only the RI's effectiveness but that of NRR as well. ~~de~~
