**10) Kewaunee - Tritium in Monitoring Well Adjacent to Auxiliary Building (4/12) - Update**  
Region had a conference call with the licensee yesterday. Licensee has formed an investigation team to look into the source of tritium in monitoring well #707, which is located about 8 feet west of the auxiliary building. Previous samples of this well were all below detectable levels, now they are routinely seeing 1,500 to 2,000 pCi/liter. They have no known sources of leakage at this time. However, as part of their investigation, the licensee left an open container with demineralized water in the aux building (unknown for how long), which wound up with about 400,000 pCi/l of tritium. Licensee has confirmed that they do not have detectable airborne activity in the auxiliary building. The licensee program is following the NEI guidance. Region will be having another phone call with the licensee on April 20. (Pass to NRR Staff Following Tritium Issues (Steve Garry and Richard Conatser); assigned to Bob Bernardo).
