Audit Report

INDEPENDENT EVALUATION OF NRC'S IMPLEMENTATION OF FISMA FOR FY 2007

OIG-07-A-19

Status of Recommendation

Recommendation 11: Develop and implement quality assurance procedures for Plan of Action and Milestones (POA&Ms).

Agency Response Dated
June 25, 2010:

CSO purchased the Xacta application for assisting in security compliance assessment, risk management and security process automation. Xacta is in the configuration phase at the CTF awaiting purchase of Structured Query Language licenses and installation/hardening of standard operating system images. Additionally, in FY 2010 the POA&M process was briefed to various system owners and internal forums, and the first POA&M scoring was developed by CSO and provided to each system owner (e.g. ML100920210). Subsequent scoring will be improved and facilitated by a POA&M checklist (ML 100840319) developed by CSO to assist in ensuring increased accuracy and completion of NRC system POA&Ms as part of the effort to continuously improve the POA&M process and ensure quality assurance. Scoring of all 3rd Quarter POA&Ms using this checklist will be provided to system owners and will continue each successive quarter thereafter.

CSO recommends that this recommendation be closed.

OIG Analysis: OIG reviewed the quality assurance procedures and determined that the actions taken to purchase software, brief system owners, and develop a scoring method meet the intent of recommendation 11. This recommendation is therefore considered closed.

Status: Closed.
