Thanks, Mark. I will incorporate these items into the Entrance Meeting. I will also call you upon arriving on site prior to the Entrance Meeting in case there are any additional items which should be identified/discussed.

Bob

Thanks Bob. This is good.

BC instructions for first week focus:

- 1) Determine whether any immediate safety concerns exist.
- 2) Review licensee schedule and develop a recommended SIT inspection plan/schedule, understanding this may need to be paced out over next couple months.
- 3) Determine whether current licensee action path appears appropriate.

Thanks for the info, Mark. By the way, I attached my inspection plan. I am not sure that it is required under these circumstances, but I did one just in case. I plan to speak from it during my entrance. Please review it and add any value you feel is appropriate.

Thanks,

Bob

Bernie, are we to contact him at this point?

We intend to do our entrance Tuesday afternoon. It is not imperative that he attends, though he is welcome if our process and travel makes it reasonable to do so. Otherwise it is ok if he joins after. This will be a drawn out SIT dependent somewhat on licensee actions and schedule.

During the first week the team will assess and determine the preliminary inspection schedule among other things. We have had inspectors there since last week, though not in SIT mode.

When clear, we need to get his contact info.

Thanks
Mark

Teresa,

Forwarded for your expedited processing is a new ORNL contract that we need in place immediately, as explained, in part, in the BACKGROUND statement of the Statement of Work. Under the circumstances, we are authorizing work ahead of receiving a proposal. Please have ORNL provided me with a draft proposal as soon as possible.

Thank you in advance for your attention to this matter.

Bernie
