Good morning, George!

I trust that you saw the attached monthly report from Dan Naus.... According to his report, all he did is go on this one trip.

Attached also is the Statement of Work. Is the scope of work still accurate. I had asked ORNL to hold off sending in their proposal until we could better define the work. Is the SOW still accurate? Are there changes we should be making? Should we ask ORNL to send in a proposal based on this SOW or are you going to be better defining our needs?

Bernie

Hi Bernie,

Attached is the MLSR for "Participation in the Crystal River Unit 3 Containment Special Inspection (J-4322)."

No equipment was purchased under this JCN.

Dan
