2) Letter from Larry A. Smith to NRC, dated July 12, 2010,
Amendment Application to Modify License Condition 18 of
Source Material License SUB-526

**Subject: Supplemental Information for License Amendment Request Dated
July 12, 2010**

Honeywell Metropolis Works (MTW) hereby submits the following additional information as a supplement to the Amendment Application Letter dated July 12, 2010 (Reference 2).

As stated in the first paragraph of the second page of the July 12, 2010 letter, the purpose of the proposed amendment application is to describe the configuration control process at MTW. This improved description will provide greater clarification of the process and consolidate certain license application sections to reduce unnecessary duplication thereby eliminating any possible confusion that may exist with regard to the scope of the configuration control program. A review of this proposed amendment demonstrated it will enhance the safety of the facility by providing a more comprehensible explanation of the configuration control process.

If you or your staff have any questions, require additional information, or wish to discuss this please contact Michael Greeno, Regulatory Affairs Manager, at (618) 309-5005.

Sincerely,

Larry A. Smith
