Thanks Lou.. Be careful of black ice on the roads here... mostly the side roads and off-ramps.
See you Monday.

Subject: Crystal River SIT

Will be leaving site this morning at 8:00am. Discussions with Meena yesterday evening with agreement that;

1. Farhad Farzam will provide support to the SIT during the months of January, February on an as needed basis, probably taking up about 75% of his time.
2. Currently his support is needed to review DBA and support on reviewing root cause evaluations.
3. NRR is in the process of issuing the new SOW for continuation of support from Oakridge National Laboratories (Dan Naus and company). They are including support from a second expert, with expertise in fracture mechanics.

George and I provided info to Meena for a status report for NRR management. I understand that she will provide a copy to you.

See you in work Monday
Lou
