Dear Mr. Meyer:

On July 22, 2010, the U.S. Nuclear Regulatory Commission (NRC) completed a security baseline inspection at your Point Beach Nuclear Plant. The inspection covered one of the key attributes of the Security Cornerstone of the NRC's Reactor Oversight Process. The enclosed inspection report documents the inspection results, which were discussed on July 22, 2010, with Mr. R. Farrell, Acting Plant Manager.

The inspection examined activities conducted under your license as they relate to security and compliance with the Commission's rules and regulations and with the conditions of your license. The inspector reviewed selected procedures and records, observed activities, and interviewed personnel.

Based on the results of this inspection, no findings of significance were identified.
