Office of Nuclear Reactor Regulation (NRR)
Items of Interest
Week Ending July 23, 2010

Acceptance of License Renewal Application for Seabrook Station

On July 13, 2010, the staff completed the acceptance review of the license renewal application for Seabrook Station, Unit 1. The staff determined that the application contains sufficient information for docketing. On June 1, 2010, the staff received the license renewal application from NextEra Energy Seabrook, LLC, requesting the extension of the operating license for an additional 20 years beyond the current 40-year term. Seabrook Station, Unit 1, is a pressurized water reactor designed by Westinghouse with a current operating license that expires at midnight on March 15, 2030. The staff plans to hold public information sessions in Hampton, NH, on August 19, 2010, to describe the license renewal process.

Kewaunee Power Station License Renewal Safety Evaluation Report with Open Items

On July 16, 2010, the staff issued the Safety Evaluation Report (SER) with Open Items related to the Kewaunee Power Station license renewal application. By letter dated August 18, 2008, Dominion Energy Kewaunee (DEK) submitted an application requesting the extension of the Kewaunee Power Station operating license for an additional 20 years. The SER has four open items. The staff is scheduled to meet with the Advisory Committee on Reactor Safeguards Subcommittee on August 18, 2010, to discuss the SER with Open Items.

Office of Nuclear Material Safety and Safeguards (NMSS)
Items of Interest
Week Ending July 23, 2010

DOE Blue Ribbon Commission on America's Nuclear Future Meeting in Richland, Washington

From July 14-15, staff from NMSS observed a public meeting of the Department of Energy (DOE) Blue Ribbon Commission (BRC) on America's Nuclear Future. The BRC met in Richland, WA, and conducted a half-day tour of high-level waste treatment and storage facilities on the DOE Hanford site, including the interim spent-fuel storage installation at the Columbia Generating Station. Presentations and statements from Governor Gregoire, Washington State Congressional members, and representatives of local Native American Tribes all stressed the importance of DOE removing high-level waste from the Hanford site in accordance with existing agreements. Other presentations stressed the need for geologic disposal of high-level waste, with a range of emphasis placed on the urgency for a disposal facility. Several speakers and BRC members stressed the importance of maintaining NRC's independent review capabilities for new technologies. Eleven members of the public provided their perspectives on the need for geologic disposal and development of nuclear technologies. The agenda, presentations, and a video webcast of the meeting are posted at http://www.brc.gov/july2010_meeting.html.

AREVA Enrichment Services LLC Proposed Eagle Rock Uranium Enrichment Facility

On July 21, *Federal Register Notice* (75 FR 42466) was published announcing the availability of the Draft Environmental Impact Statement (EIS) for the Proposed Eagle Rock Uranium Enrichment Facility and the public meeting to be held August 12 in Idaho Falls. The public comment period on the Draft EIS will begin on the date of publication of the U.S. Environmental Protection Agency's *Federal Register Notice* of Filing and ends on September 13, 2010.

Office of Federal and State Materials and Environmental Management Programs (FSME)
Items of Interest
Week Ending July 23, 2010

NUHOMS® HD, Revision 1:

Federal Register notices were published on July 16, 2010, withdrawing a direct final rule entitled "List of Approved Spent Fuel Storage Casks: NUHOMS^R HD Revision 1" (75 FR 24786; May 7, 2010), and the companion proposed rule (75 FR 25120; May 6, 2010). The NRC is taking this action because the applicant identified that a certain Technical Specifications (TS) for Boral characterization was not written precisely and in a manner that could be readily and demonstrably implemented. Specifically, the requirements for meeting TS 4.3.1, "Neutron Absorber Tests," which references Section 9.1.7.3 of the Safety Analysis Report, are not precisely quantified in that it requires that "the average size of the boron carbide particles in the finished product is approximately 50 microns after rolling." Use of language such as "average" and "approximately" is imprecise and no ranges or statistical variations are specified. The NRC will publish a revised direct final rule along with its companion proposed rule after the necessary revisions to the TS are made.

NAC-MPC System, Revision 6:

A direct final rule entitled "List of Approved Spent Fuel Storage Casks: NAC-MPC System, Revision 6" was published in the *Federal Register* on July 21, 2010, (75 FR 42292). The companion proposed rule was published at 75 FR 42339. The direct final rule amends Part 72 by revising the NAC International, Inc., NAC-MPC System listing in 10 CFR 72.214 to include Amendment No. 6 to the Certificate of Compliance, No. 1025. Amendment No. 6 will make changes to the configuration of the NAC-MPC storage system as noted in Appendix B of the TS; revise Definitions in TS 1.1 to include modifications and newly defined terms; revise the Limiting Conditions for Operation and associated Surveillance Requirements in TS 3.1 and 3.2; and make editorial changes in TS 5.2 and 5.4. The cask amendment will allow holders of power reactor operating licenses to load spent fuel in the NAC-MPC cask system under the revised conditions. The final rule is effective on October 4, 2010, unless significant adverse comments are received by August 20, 2010.

Office of Nuclear Regulatory Research (RES)
Items of Interest
Week Ending July 23, 2010

RES Publication of Draft Regulatory Guide 1234 (DG-1234) “Water Sources for Long-Term Recirculation Cooling Following a Loss-of-Coolant Accident”

On July 15, 2010, the RES staff issued DG-1234 to provide an opportunity for public comments. The DG is a proposed revision 4 of Regulatory Guide 1.82 that describes acceptable methods to implement requirements regarding the sumps and suppression pools that provide water sources for emergency core cooling, containment heat removal, or containment atmosphere cleanup systems. It also provides guidelines for evaluating the adequacy and the availability of the sump or suppression pool for long-term recirculation cooling following a loss-of-coolant accident. This guide applies to both pressurized-water reactor and boiling-water reactor types of light-water reactors. DG-1234 is available on the NRC Web site at <http://www.nrc.gov/reading-rm/doc-collections/reg-guides/power-reactors/draft-index.html>.

RES Publication of Regulatory Guide (RG) 8.40, “Methods for Measuring Effective Dose Equivalent from External Exposure”

On July 20, 2010, the RES staff published RG 8.40 that describes dosimetry methods that the NRC staff considers acceptable for determining the effective dose equivalent for external (EDEX) radiation exposures. These methods provide a conservative estimate of the EDEX and may be used to calculate the total effective dose equivalent (TEDE) in demonstrating compliance with TEDE-based NRC regulatory requirements. RG 8.40 is available on the NRC Web site at <http://www.nrc.gov/reading-rm/doc-collections/reg-guides/occupational-health/rg/>.

RES Publication of RG 1.141, Revision 1, “Containment Isolation Provisions for Fluids Systems”

On July 22, 2010, the RES staff published RG 1.141 that describes updated methods that the NRC staff considers acceptable for use in complying with the Commission’s requirements for isolation of fluid systems that penetrate containment. RG 1.141 is available on the NRC Web site at <http://www.nrc.gov/reading-rm/doc-collections/reg-guides/power-reactors/rg/>.

RES Withdraws RG 5.17, “Truck Identification Markings”

On July 23, 2010, the RES staff published a *Federal Register* Notice announcing the withdrawal of RG 5.17, “Truck Identification Markings.” The RG identifies methods acceptable to the NRC staff for complying with the former NRC regulation 10 CFR 73.31(e) (1973), “Shipment by Road,” with regard to markings applied to a road vehicle to enhance its identification from the air. RG 5.17 is no longer needed because §73.31(e) has been deleted (44 FR 68184; November 28, 1979) and the information is now contained in the U.S. Department of Transportation regulation 49 CFR Part 172 through 180.

Office of Administration (ADM)

Public Records, Final Rule, 10 CFR Part 9 (RIN 3150-AI87, NRC-2010-0157)

On July 16, 2010, the NRC published a final rule (75 FR 41368) in the *Federal Register* amending its regulations to change the fees for search and review of agency records by NRC personnel. These changes are necessary due to the Biennial Review of Fees for the Freedom of Information Act, as required by the Chief Financial Officer's Act of 1990 and Office of Management and Budget Circular No. A-25. The final rule is effective on August, 16, 2010.

Electric Hearing Docket

On July 16, 2010, as a result of an 8(a) non-competitive solicitation, a time-and-materials contract (NRC-33-10-356) was awarded to CTEC Corporation, in Reston, VA for modernization of the Electronic Hearing Docket. The period of performance is July 16, 2010, through July 15, 2011, with a 1-year option to extend the term of the contract. The total estimated ceiling cost is \$816,593.76 inclusive of all options.

Research Operations Management Application (ROMA)

On July 16, 2010, as a result of an 8(a) non-competitive solicitation, a hybrid (time and materials and fixed price) Indefinite-Delivery Indefinite-Quantity contract (NRC-04-10-145) was awarded to KMC, Inc. of McLean, VA for NRC-wide ROMA support, ROMA maintenance and implementation, and ROMA training for any NRC offices. The period of performance is July 16, 2010, through July 15, 2011, with a 1-year option to extend the term of the contract. The total estimated ceiling cost is \$950,000.00 inclusive of all options.

Digital Data Management System

On July 16, 2010, a competitive GSA schedule order (NRC-DR-21-10-496) was awarded to Avaya Government Solutions in Fairfax, VA to provide operations and maintenance support for the Digital Data Management System installations at the Rockville ASLB hearing room and the Las Vegas hearing facility. The Contractor will also support the application installations in the Consolidated Test Facility, the Test and Acceptance Environment, and/or the Contractor development lab. In addition, the Contractor will provide day-to-day hearing support for hearings held at the Rockville ALSB hearing room, the Las Vegas hearing facility, and remote locations or other hearing sites throughout the United States and its territories. The period of performance is September 15, 2010, through September 14, 2011, with four 1-year option periods. The total estimated ceiling cost is \$9,164,057.14 inclusive of all options.

Requirements for Fingerprint-Based Criminal History Records Check for Individuals Seeking Unescorted Access to Research or Test Reactors, Proposed Rule, 10 CFR Part 73 (RIN 3150-AI25, NRC-2008-0619)

On July 20, 2010, the NRC published a proposed rule (75 FR 42000) in the *Federal Register* that would amend its regulations to require research and test reactor licensees (also called nonpower reactor licensees) to obtain a fingerprint-based criminal history records check before granting any individual unescorted access to their facilities. This action is necessary to comply with the requirements of Section 652 of the Energy Policy Act of 2005, which amended Section 149 of the Atomic Energy Act of 1954, as amended, to require fingerprinting and a Federal Bureau of Investigation identification and a criminal history records check of any person who is permitted unescorted access to a utilization facility. The comment period for the proposed rule closes October 4, 2010. Comments on the information collection aspects must be filed by September 20, 2010.
