Attachments: FINAL RAI 257 NSIR ISCPB 4887.doc

Attached please find the subject request for additional information (RAI). The draft of this RAI was sent to you on July 22, 2010. A clarification phone call on the draft RAI, requested by UniStar, was held on August 2, 2010. No changes to the draft question sent previously were made resulting from this phone call.

The schedule we have established for review of your application assumes technically correct and complete responses within 30 days of receipt of RAIs. For any RAIs that cannot be answered within 30 days, it is expected that a schedule date for submitting your technically correct and complete response will be provided to the staff within the 30 day period so that the staff can assess how this information will impact the review schedule.

Your response letter should also include a statement confirming that the response does or does not contain any sensitive or proprietary information.

Thanks.

Docket No. 52-016

SRP Section: 13.06.06 - Cyber Security (Future SRP Section)

Application Section: CSP

QUESTIONS for Integrated Security Coordination and Policy Branch (NSIR/DSP/ISCPB)

13.06.06-4

An applicant's cyber security program must be designed to apply and maintain defense in depth defensive strategies to comply with 10 CFR 73.54 (c)(2). The Calvert Cliffs 3 proposed cyber security plan, Section 4.3, Defense-in-Depth Protective Strategies discusses the defensive architecture which will protect the critical digital assets at Calvert Cliffs 3. At a public meeting on June 25, 2010 (ML101580505) representatives of AREVA, the designer of the plant to be built at Calvert Cliffs, stated they would redesign the I&C data communications system and a drawing of a modified defensive architecture was provided to the NRC staff. (ML101820131). Please confirm that the defensive architecture information provided in the proposed Calvert Cliffs 3 cyber security plan will not be changed due to I&C data communications design changes being made by AREVA.
