

***Scott Northard, Manager***

Scott Northard is the Recovery Plan Manager at the Prairie Island Nuclear Generating Plant and is responsible for developing and executing the plan for returning Prairie Island to NRC Reactor Oversight Process Column 1 in the Action Matrix, and improving plant organizational performance to industry leading status.

Mr Northard has more than 30 years of experience in the nuclear industry, including positions as Plant Manager, Regulatory Affairs Manager, Nuclear Safety Assurance Manager, Business Support Manager, Site Engineering Director, Director Asset Management, and Manager Nuclear Projects.

Mr Northard earned his Bachelor of Science degree in Nuclear Engineering from the University of Wisconsin in Madison. He has attended the INPO Senior Nuclear Plant Manager Course, is a graduate of the Nuclear Management Development Course at the University of Minnesota Carlson School of Management, and a graduate of the Kellogg School of Management Executive Development Program, and formerly held an SRO license at the Prairie Island plant.
