Office of Nuclear Material Safety and Safeguards  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

SUBJECT: Request for a One-Time Approval of a Shipment in the 10-60B Package

Dear Mr. Saverot:

EnergySolutions requests a one-time approval to transport one gram of Am-241 (3.4 Ci) in the form of americium chloride powder in a secondary container in the 10-160B package. An amendment request is under review for this package and we request this one-time approval to avoid a shipping delay if the amendment request is still under review at the time of the shipment. The shipment is currently planned for September 14<sup>th</sup>. To allow some flexibility in scheduling, we request the approval be granted for a period of 30 days beginning September 1<sup>st</sup>.

Should you or members of your staff have any additional questions about the request, please contact me at (803) 758-1898.

Sincerely,

A handwritten signature in black ink, appearing to read 'mwhittaker'.
