Dear Ms Cook,

As RSO for NRC license 17-14996-01 AT THE National Hansen's Disease Programs I am requesting that the license reflect the addition of Richard W. Truman, Ph.D. as an Authorized User (AU). I have attached a list of Dr. Truman's training and experience with isotopes for your perusal. Please let me know if you need further information regarding this matter.

Best regards,

J. P. Pasqua
RSO, Laboratory Research Branch

Thomas P. Gillis, Ph.D.
Chief Laboratory Research Branch

Richard W. Truman, Ph.D.

Types of licensed material to be used:

Tritiated biomolecules (e.g., H-3 palmitate for labeling bacterial suspensions)
Carbon-14 labeled biomolecules (e.g., C-14 amino acids for labeling proteins)

Quantities of licensed material to be used:

H-3 not to exceed 10 millicuries
C-14 not to exceed 10 millicuries

Experience/training for use of listed isotopes:

Dr. Truman has had 8 hours of undergraduate classroom training in theory and usage of radioisotopes at West Virginia University. He received additional training and experience in graduate courses at Louisiana State University where he received a Masters in Microbiology with a minor in Biochemistry. Dr. Truman has on-the-job-training with both tritiated and carbon-14-labeled compounds under the direction of NRC licensed user Thomas P. Gillis for approximately 1 year (2000-2001) and has continued to use these compounds for another 10 years under similar supervision. He is well versed in the safety precautions and record keeping systems required in a modern laboratory.
