Attachments: Intervener's Petition (Jan 11, 2010).pdf

Thanks Lou,

I have been looking at the refutes in the concrete area and providing feedback to George. I looked quickly at petrography reports and didn't see anything that unusual, but will look at in more detail. Also will look at material I received late yesterday. I also talked to Jy-An Wang and he reconfirmed that he can review any analyses or fracture mechanics work.

You noted that a paper Herman Graves and I wrote on inspection was cited by an intervener relative to Crystal River. Is there a copy of his petition available so I can see how paper was referenced? This paper was written about ten years ago and there have been many advancements since then, inspection requirements have increased, and there is a history of good operating experience relative to the structures.

Outside of Scope

Best regards,

Dan

George has informed me that the new PO for your services will be finalized in the near future. However, George will be sending documents (latest petrographic reports) for your review before then. Let me know if there will be any problems.
