Outside of Scope

Outside of Scope

6.) Crystal River - Crack on Exterior Containment Wall Picture 032.jpg

Hydro-demolition of the RB opening was restarted on Friday morning. Licensee reports hydro-demolition is nearing the liner plate. Licensee is investigating a vertical crack (1/2" wide, about 18" deep) found in the area of hydro-demolition that extends outside the area being worked as evidenced by water leaking through the crack and coming out an area that is outside the hydro-demolition work area. A root cause investigation is in progress. Sargent and Lundy is involved with the investigation and corrective actions. This issue will be turned over to the Steam Generator Replacement (SGR) inspection team (led by R.Chou) who will be on-site today. (Continue to follow, pass to Containment TRG and Structural TRG Lead, Goutam Bagchi; assigned to Dave Garmon)
