Richard Granberg, RSO

MPI Research
269-668-3336

SUBJECT

C/N 300386

SUMMARY

I called Mr. Granberg to discuss MPI's amendment request dated 5/21/2010. I asked that he describe, in writing, MPI's proposed use of the Mo-99/Tc-99m generators. He confirmed that the use will not involve the administration of Tc-99m to humans. He will submit a description of their proposed use in writing.

I also asked him to include a description of how the waste will be processed, and how the generators will be stored and shielded when in use, as well as the maximum possession limit they will need.

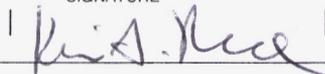

ACTION REQUIRED

Submit the additional information via FAX to 630-515-1078, and e-mail
