

Outside of Scope

*outside of scope*

The State of New Mexico staff indicated to the EPA representatives that New Mexico desired that EPA expand the scope of study at the Churchrock site and consider the stabilization of the pile and the entire decommissioning and reclamation of the processing facility also under the Superfund Act. The EPA representatives felt that it was warranted and authorized under Superfund to carry out long term stabilization of all hazardous wastes at this site and agreed to expand the study. The State of New Mexico staff also asked the EPA representatives to look into the possibility of declaring the Anaconda Blue Water facility as a Superfund site in addition to the Churchrock Mill and the Homestake Mill already on the national priority list. New Mexico staff indicated their intention to potentially seek the concurrence of EPA that all the uranium
