

Daily Note—Non-public Meeting

On July 28-30, 2010, an NRC staff member observed a non-public, periodic status meeting of the Department of Energy's Used Fuel Disposition Campaign. Representatives from the Department of Energy/Office of Nuclear Energy and from nine national laboratories reported on progress for future alternatives for storage and disposal of commercial spent nuclear fuel and high-level radioactive waste. Staff from several nuclear industry firms, the Nuclear Waste Technical Review Board, and university researchers also attended.
