Watts Bar Nuclear Plant, Unit 2
NRC Docket No. 50-391

Subject: Watts Bar Nuclear Plant (WBN) Unit 2 - Response to Request For Additional Information (RAI) Regarding Licensee's Final Safety Analysis Report Amendment Related To Chapter 8, "Electric Power" (TAC No. ME2731)

Reference: 1. Letter from NRC to TVA, "Watts Bar Nuclear Plant, Unit 2 - Request for Additional Information Regarding Licensee's Final Safety Analysis Report Amendment Related to Chapter 8, 'Electric Power' (TAC No. ME2731)," dated July 15, 2010 [ML101800156]

This letter transmits WBN Unit 2 Final Safety Analysis (FSAR) drawings to the U. S. Nuclear Regulatory Commission (NRC) as requested in Reference 1.

By letters dated November 24, 2009; December 14, 2009; January 11, 2010; May 7, 2010; and May 17, 2010, the Tennessee Valley Authority submitted FSAR Amendments 95, 96, 97, 98, and 99, respectively. The drawings in the FSAR amendments contained detail that was not readable.

Electronic files for the drawings requested in the RAI (Reference 1) are provided on the enclosed Optical Storage Media (OSM) in a format in which the detail is now readable. Note that optical character recognition (OCR) could not be performed on these files due to their size. Hard copies of the drawings have been provided to the NRC Staff separately from this letter.

There are no new regulatory commitments associated with this submittal. If you have any questions, please contact Bill Crouch at (423) 365-2004.
