Subject: not in favor of additional FPL reactors

I am not in favor of the proposal to construct two new nuclear reactors at Turkey Point in Miami-Dade County.

I am fairly certain that FPL has done less than any other utility to try to curb electrical usage in our community through demand side management. They have no true incentive to do so.

The new reactors are too costly and will require too much water. If we don't have the ability to totally control oil wells in the ocean, I would say we should be humble enough to admit that we don't have the ability to totally control nuclear energy. And if we don't have total control, then we shouldn't be using it.

We can do better through major investments in energy efficiency, conservation, and renewables. No health risks involved if a solar panel breaks.....

thank you,
Susannah Troner
