Re: PSEG Nuclear's License Renewal for Salem and Hope Creek Generating Stations

My name is Ellen B. Pompper, and I am the current Mayor of Lower Alloways Creek Township. We are the host municipality for PSEG Nuclear's Salem & Hope Creek stations. I have lived in Lower Alloways Creek Township for over 30 years and served on local government for 12 years, 5 of those years as Mayor.

While some may not want a nuclear plant in their backyard, we welcome PSEG Nuclear, who we consider a good friend and neighbor. PSEG is transparent and open with us. They are quick to call me and let me know of plant issues and news worthy items that affect us. Each Month, I and other Township Officials meet with PSEG Nuclear. We discuss plant operations and other points of interest that impact not only Salem and Hope Creek, but also our community.

As you know, nuclear is a clean source of energy. The plants produce a significant amount of electricity without emitting carbon dioxide and other greenhouse gases.

Our community is dotted with farms that also have seen no environmental impact. PSEG has an extensive monitoring program that ensures the health and safety of the public especially those in Lower Alloways Creek.

I support the license renewal for Salem and Hope Creek another 20 years and ask that the NRC approve this life extension for these stations.

Thank You

Ellen B. Pompper, Mayor Lower Alloways Creek Township
