RE: Renewal Request for USA/9269/B(U)-96 (Current Revision 5)

Dear Mr. Saverot:

QSA Global, Inc. confirms that we will not manufacture any new Model 650L packages under this approval. We will limit fabrication to replacement components needed to support shipment of existing packages to allow for continued transport of these containers. This fabrication can include manufacture of all components on this container except for the depleted uranium shield and the inner carbon steel shell. All other items/components on this package are considered replaceable and could be fabricated to extend the container life under this renewal application. Should you have any additional questions or wish to discuss this submission after receipt please feel free to contact me.

Sincerely,

Lori Podolak
