Subject: Acceptance Review for Proposed Revision to Appendix B Environmental TSs

Doug,

By letter dated June 11, 2010, Exelon Generation Company, LLC submitted a request modify the Appendix B, Environmental Technical Specifications for Oyster Creek. The amendment would modify Section 3.3 regarding the review and audit function (TAC No. ME4072).

The purpose of this e-mail is to provide you with the results of the Nuclear Regulatory Commission (NRC) staff's acceptance review of the submittal. The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review. The acceptance review is also intended to identify whether the application has any readily apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the plant.

The NRC staff has reviewed your submittal and concluded that it does provide technical information in sufficient detail to enable the NRC staff to proceed with its detailed technical review and make an independent assessment regarding the acceptability of the proposed amendment in terms of regulatory requirements and protection of public health and safety and the environment.

If additional information is needed for the staff to complete its technical review, you will be advised by separate correspondence. If you have any questions, please contact me at (301) 415-2481.

G. Edward Miller
Project Manager
Plant Licensing Branch I-2
Division of Operating Reactor Licensing
