

Guidelines for Managing Changes Under 10 CFR Part 52 Processes

1. Introduction

1.1. Purpose and Scope

1.2. Summary of 10 CFR Part 52 Change Processes

- 1.2.1. Changes to or Departures from Design Certification Information
 - 1.2.1.1. Tier 1 Information
 - 1.2.1.2. Tier 2 Information
 - 1.2.1.3. Tier 2* Information
 - 1.2.1.4. Generic Technical Specifications and Other Operational Requirements
- 1.2.2. Changes to Plant-Specific Facilities or Procedures Described in the FSAR
 - 1.2.2.1. COL FSAR Changes Subject to 10 CFR 50.59
 - 1.2.2.2. Changes to Plant-Specific ITAAC
 - 1.2.2.3. Changes to Plant-Specific Technical Specifications
- 1.2.3. Other Change Processes
 - 1.2.3.1. Security Plan
 - 1.2.3.2. Quality Assurance Program
 - 1.2.3.3. Emergency Plan
 - 1.2.3.4. Cyber Security Plan
 - 1.2.3.5. Fire Protection Plan
 - 1.2.3.6. Aircraft Impact Assessment
 - 1.2.3.7. Loss of Large Area Assessment
 - 1.2.3.8. Probabilistic Risk Assessment
 - 1.2.3.9. Other Plans and Operational Programs
- 1.2.4. Changes to Early Site Permits
- 1.2.5. Changes to Limited Work Authorizations

1.3. Relationship of 10 CFR Part 52 Change Processes to Other Requirements and Controls

- 1.3.1. Relationship to Other Processes that Control Licensing Basis Activities
 - 1.3.1.1. Exemptions
 - 1.3.1.2. License Amendments
 - 1.3.1.3. Changes Controlled by More Specific Regulations
 - 1.3.1.4. Licensee Commitments
 - 1.3.1.5. License Conditions
- 1.3.2. Relationship to 10 CFR Part 50, Appendix B
- 1.3.3. Relationship to the FSAR (updating the FSAR in accordance with 10 CFR 50.71(e))
- 1.3.4. Relationship to 10 CFR 50.2 Design Bases

1.4. Content of This Guidance Document

2. Defense in Depth Philosophy

3. Definitions and Applicability of Terms

- 3.1. Accidents Previously Evaluated in the FSAR/Plant-Specific DCD
- 3.2. All Matters Described in the Plant-Specific DCD (VIII.B.5.a)
- 3.3. Change/Departure
- 3.4. Departure Evaluation Process
- 3.5. Departure from a Method of Evaluation Described in the FSAR/Plant-Specific DCD
- 3.6. Design Basis for Combined License
- 3.7. Design Control Document (DCD)
- 3.8. Ex-vessel Severe Accident
- 3.9. Final Safety Analysis Report for Combined License
- 3.10. Input Parameters
- 3.11. Licensing Basis for Combined License
- 3.12. Malfunction of an SSC Important to Safety
- 3.13. Methods of Evaluation
- 3.14. Other Operational Requirements
- 3.15. Plant-Specific DCD
- 3.16. Procedures as Described in the FSAR/SSAR/Plant-Specific DCD
- 3.17. Regulatory Treatment of Non-Safety Systems (RTNSS)
- 3.18. Safety Analyses
- 3.19. Screening
- 3.20. Site Safety Analysis Report (SSAR) for Early Site Permits

4. Implementation Guidance Under a Part 52 License

4.1. Departures from Design Certification Information

- 4.1.1. Departures from Tier 1 Information
- 4.1.2. Departures from Tier 2 Information
 - 4.1.2.1. Screening
 - 4.1.2.2. Evaluation
 - 4.1.2.2.1. B.5.b criteria
 - 4.1.2.2.2. B.5.c criteria
 - 4.1.2.2.3. B.5.d criteria
- 4.1.3. Departures from Tier 2* Information

4.2. Changes to Plant-Specific Facilities or Procedures Described in the FSAR

- 4.2.1. COL FSAR Changes Subject to 10 CFR 50.59
 - 4.2.1.1. Screening
 - 4.2.1.2. Evaluation
- 4.2.2. Changes to Plant-Specific ITAAC
- 4.2.3. Changes to Plant-Specific Technical Specifications

4.3. Changes to Probabilistic Risk Assessments

4.4. Changes to Early Site Permits

- 4.4.1. Limited Work Authorizations
- 4.4.2. Other Site Safety Analysis Report (SSAR) Information
- 4.4.3. Changes to Permit

4.5. Changes Under Limited Work Authorizations (no ESP involved)

4.6. Disposition of Departures and Changes

5. Documentation and Reporting

DRAFT
