No, Helena will continue to be a storage/use location. We didn't like that gauge and never could get Seaman to get it repaired to the point that we thought the density test results are dependably accurate. We are likely going to acquire a Troxler densometer, in the future.

You will have to leave the Seaman C-300 authorization on the HSG license, since HSG dba Blahnik Construction has one of those gauges in Hamilton.

Reply again if you have further questions.

Several questions.

1. Do you want me to leave or remove the Seaman C-300 authorization from License 25-29363-01? (Conditions 6.B., 7.B., 8.B. and 9.B.)
2. Do you want me to leave or remove the Helena location of use? (Condition 10.A)
3. If the Helena location needs to be removed then provide leak test result for the gauge that was sold so I can remove this location from the license.

Thank you.

Good Morning Roberto,

Attached is a letter informing the NRC that we have sold the nuclear density gauge that we had at the Helena, Montana location.

The original letter and signature are being sent to you in today's mail.

Subject: NRC License No. 25-29363-01
Helena Sand & Gravel, Inc.
Helena & Hamilton, Montana

Dear Mr. Torres:

Helena Sand & Gravel, Inc. (HSG) was recently issued a license to possess and use nuclear density gauges at various locations during construction of projects in the western Montana area. Under our license, HSG possesses a C-300 Seaman Nuclear gauge, serial number 21026 at the Helena, Montana location.

The purpose for this letter is to inform the U.S. Nuclear Regulatory Commission that we have recently sold this gauge to Schellinger Construction Company, NRC License No. 25-29318-01. Enclosed is a copy of our invoice to Schellinger Construction. Therefore, we currently do not have any nuclear gauges located at our Helena location.

If you have any questions concerning this information, please contact me at your convenience. I can be reached at (406) 459-3701 or (406) 441-9611.

Sincerely,

Jeremiah B. Bowser, P.E.
