Subject: Deficiency Telephone Call.		
<p>Summary: I left messages on the voice-mails of Mr. Frank DiGregorio (302-892-6200) and Habib Bolourchi, M.D. (302-645-7672)</p> <p>11/01/2001 09:30 I was informed that Dr. Bolourchi was not in but would return my call.</p> <p>I contacted Mr. DiGregorio. I informed him that I could not process the facsimile dated October 30, 2001 because it was unsigned. He stated that he understood and would speak to Dr. Bolourchi about the letter. I stated that I would do so directly but wanted to inform him about the letter.</p> <p>10:15 Dr. Bolourchi left a message on my voice-mail.</p> <p>10:30 I spoke with Dr. Bolourchi. He stated that he sent in the letter unsigned because he wanted me to review it before sending it to the Integral Nuclear Associates representative for signature. I stated that I could not review an unofficial document. He stated that he would send the letter on for signature. He also questioned me concerning how to add physicians onto the license. I stated that if a physician is board-certified or listed on an NRC or Agreement State license within the last seven years, then the physician could perform work unsupervised if the licensee sends in a request within thirty days of his starting work to the Commission. Otherwise, the physician would have to wait until after the processing of an amendment request before starting unsupervised work.</p>
