Re: Geo Cim, Inc. License No. 52-17776-02

Dear Mr. Lohdi

We hereby submit our request to amend license # 52-17776-02 to include two new Dual Probe Density Gauges (formerly manufactured by CPN, now Instrotek), Model MC-S-24 Stratagauge. These units have the same sealed source as the CPN Model CPN-131,

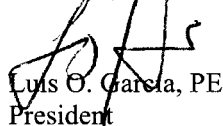

Isotope	Maximum Activity
Cesium -137	10 millicuries
Americium-241 / Beryllium	50 millicuries

These units will be used for testing during the construction of the Portugues roller compacted concrete Dam (RCC), in Ponce, PR, a project by the US Army Corps of Engineers. The two units will be stored at the Project's laboratory facilities of the general contractor, DRAGADOS-USA, Inc. The physical location where the gauges will be stored at the project site is at the materials testing laboratory building of

DRAGADOS-USA, Inc.  
Portugues Dam Site  
State Road PR 10, Km. 5.5  
Ponce, Puerto Rico 00731

We are working for Dragados-USA, Inc. providing the soils and concrete technicians for the quality control tests and the units will be under our custody in the laboratory. At the completion of this project in approximately 2 years, the two units will be stored in our Geo Cim, Inc. facility, until they are needed again in a similar project, or sold to another entity with the correct license, or disposed off properly according to regulations.

Sincerely,  
Geo Cim, Inc.

  
Luis O. Garcia, PE  
President
