Subject: Photos Of Core #5

Here are 2 photos Core #5 (with delam) for your review and info. I also got boroscope video of Core #5 (with delam) and another Core #37 (with no delam) but those files are too big (500 MB and 200 MB) to be sent by email. I have put it in the Requested by NRC folder on CR-3's L:\Shared drive. I will forward Rich Chou the 2 petrographic analysis reports for Core #5 that I sent the rest of the team yesterday.

Thanks.
George
