

August 24, 2010

Mr. David Greene
Department of the Interior
7301 Calle Aqua Salada
Bureau of Reclamation, YAO-3420
Yuma, AZ 85364

Dear Mr. Greene:

This letter is to follow up our conversation with you. As an U.S. Nuclear Regulatory Commission (NRC) licensee, we would like to invite you to attend our upcoming public meeting to be held on September 28, 2010, from 8:30 a.m. to 4:30 p.m. at the Las Vegas Hearing Facility, 3250 Pepper Lane, Las Vegas, NV 89120.

The purpose of this meeting is to provide an opportunity for regulated entities such as yourself, to provide your thoughts on a revised draft safety culture policy statement, which includes a definition of safety culture as well as a set of traits describing characteristics of a positive safety culture. Unlike a regulation which is enforceable, a policy statement is a tool for the Commission to address activities that are within NRC jurisdiction and of particular interest and importance to the Commission. The NRC, as a regulator, has an independent oversight role and we believe all organizations and individuals involved in NRC-regulated activities should have a positive safety culture.

The NRC staff previously published a draft safety culture policy statement in the November 6, 2009, *Federal Register* for public comment, which included a proposed definition of safety culture. To learn more about this safety culture initiative, please refer to the NRC's safety culture website <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. As one of the NRC staff's outreach activities to engage stakeholders, a public workshop was held in February 2010 with a wide range of stakeholders who reached alignment on a high-level definition of safety culture and further developed a set of traits describing characteristics of a strong safety culture. The participants were from industries such as the medical field, radiography, those involved with gauges, and those involved with nuclear power reactors.

The NRC staff used the workshop input, along with other input received from various outreach efforts as well as comments to the November 6, 2009, *Federal Register* Notice to develop a

revised safety culture policy statement, which includes the revised definition of safety culture and the set of descriptive traits. This revised safety culture policy statement will be published around September 10, 2010, in the *Federal Register* for a 30-day public comment period and will also be posted on the NRC's Safety Culture web page.

In an effort to obtain as much input as possible for this revised safety culture policy statement, we are holding the public meeting in Las Vegas and want to encourage you to attend, participate through a web broadcast of the public meeting, or provide your written comments.

If you have any questions, please contact Maria Schwartz at 301-415-1888 or by e-mail at maria.schwartz@nrc.gov or Catherine Thompson at 301-415-3409 or by e-mail at Catherine.thompson@nrc.gov.

Sincerely,

/RA/
