United States Nuclear Regulatory Commission
Attn: Keith McConnell, Deputy Director
Decommissioning and Uranium Recovery
Licensing Directorate
Division of Waste Management and Environmental
Protection
Office of Federal and State Materials and
Environmental Management Programs
Washington, D.C. 20555-0001

Dear Mr. McConnell:

This letter is being submitted by Strata Energy (Strata) to request a quarterly meeting in mid-October, 2010 with NRC Staff regarding its proposed license application for a new in situ leach uranium recovery (ISR) facility (the proposed "Ross ISR Project") in the State of Wyoming to provide NRC Staff with a continued update as to the progress this application's submission. To date, Strata has requested and actively participated in three (3) quarterly meetings at which extensive information has been discussed regarding pre-operational data gathering and analytical methods for matters including radiological and *non*-radiological health and safety, historic and cultural resources, and groundwater protection and restoration. Accordingly, Strata believes that the final pre-license application submission meeting should be at the proposed Ross ISR Project site, because it is important to understand the features of the site that they will be analyzing in Strata's forthcoming license application and to review the proposed license application to ensure satisfaction of NRC Staff's acceptance review criteria.

Currently, Strata is available to schedule this meeting anytime mid-October, 2010. If you have any questions regarding Strata's meeting proposal, please do not hesitate to contact me at your earliest convenience. Thank you in advance for your time and consideration in this matter, and I very much look forward to meeting with you soon.

Respectfully Submitted,

Christopher S. Pugsley, Esq.
