DOCKETED  
USNRC

'99 SEP 13 A11:37

Dear Joan,

I have yet to hear from your Office of Public Affairs regarding relaxation of rules concerning low-level radioactive waste being added to new steel, brass, copper, gold, silver, etc.

OFFICE OF PUBLIC AFFAIRS  
RULEMAKING AND ADJUDICATION  
STAFF

So that there is no question, I vehemently protest ANY relaxation of rules in this matter, and I insist that NRC and OEC stop the recycling of these dangerous metals. I consider allowing the recycling of radioactive metals to be crossing the line between good and bad mental health. I will also be talking to myt senators and congressman to protest this knuckleheaded move.

Thanks for passing this on. Is there a website where I can see who else has complained about this, either on the internet or by phone or letter?

Curt

**Place:** SECY

Dear Mr. Anderson:

As announced in a press release issued on June 24, the NRC is seeking public comments on issues associated with the release of solid materials having very small amounts of residual radioactivity from licensed facilities.

Comments should be addressed to the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Rulemaking and Adjudications Staff. Comments may also be submitted electronically through the NRC's Internet website at <http://ruleforum.llnl.gov/cgi-bin/rulemake>.

I will forward your e-mail to the Secretary.
