RE: Florida Power and Light Company — Notification and Request for Consultation and Participation in the Scoping Process for the Environmental Review of Turkey Point, Units 6 and 7 Combined License Application in Miami-Dade County

Dear Chief:

We welcome the opportunity to be a consulting party in the scoping process for the above mentioned project. Our utmost concern will be to ensure that areas of archaeological importance will be identified and protected from any ground disturbing activities, and that all designated historic sites and structures, as well as those eligible for designation, will be identified, documented and protected from any new construction or view shed obstruction associated with both the new on-site structures and the transmission line corridors and related structures.

We are aware that the Department of State's Division of Historical Resources will also be a part of the consultation process and has already made recommendations based on several previous cultural resource assessment surveys performed by Janus Research. We concur with those recommendations and also offer the following:

1. For all areas that have not been previously surveyed, our staff shall be notified once surveying has commenced. The County archaeologist will have the opportunity to comment on any new visual surveys performed to determine areas of high archaeological probability.
2. We concur with the development of an unanticipated finds plan, and request that the Office of Historic and Archaeological Resources be added to the contact list, should a find occur.
3. View sheds and view corridors shall be considered during the identification of the Area of Potential Effect as part of the surveys for potential impacts to historic sites and structures.
4. Copies of all new FMSF forms, created as a result of historic or archaeological resource surveys, shall be provided to our office.
5. The Office of Historic and Archaeological Resources shall have the opportunity to review and comment on any survey findings related to historic resources or

eligible resources that are found within or in close proximity to the transmission line corridors.

6. The Office of Historic and Archaeological Resources shall be included in determining the Area of Potential Effect (APE) and shall be permitted to review and comment on any additional reconnaissance level historic resource surveys conducted in such areas.

We look forward to working with you on this very important project in Miami Dade County.

Sincerely,

A handwritten signature in black ink that reads "Kathleen Kauffman". The signature is written in a cursive, flowing style.

Kathleen Slesnick Kauffman
Historic Preservation Chief
