To whom it may concern:

As a follow-up to the phone conversation of Aug 17, 2010 with Mr. Hector Bermudez, we would like to correct our request for amendment.

Instead of referring to the Regulatory Guide 8.23 for removable surface contamination in restricted and unrestricted areas of our building, we would like to amend Point F to read: "The maximum allowable surface contamination levels authorized in restricted and unrestricted areas and for uncontrolled release of equipment will be in compliance with guidance in Appendix R of NUREG-1556, Vol. 9"

Regards,

Gabriella Bedarida, MD PhD
