SUPPLEMENTARY INFORMATION: Section 303(d) of the Clean Water Act (CWA) requires that each State identify those waters for which existing technology-based pollution controls are not stringent enough to attain or maintain State water quality standards. For those waters, States are required to establish TMDLs according to a priority ranking.

EPA's Water Quality Planning and Management regulations include requirements related to the implementation of Section 303(d) of the CWA (40 CFR 130.7). The regulations require States to identify water-quality-limited waters still requiring TMDLs every two years. The lists of waters still needing TMDLs must also include priority rankings, identify the pollutants causing the impairment, and must identify the waters targeted for TMDL development during the next two years (40 CFR 130.7).

Consistent with EPA's regulations, South Dakota submitted to EPA its listing decisions under Section 303(d)(2) in correspondence dated March 29, 2010. On July 9, 2010, EPA approved South Dakota's listing of 151 waters and associated priority rankings. EPA disapproved South Dakota's decision not to include 12 lakes in its list. EPA solicits public comment on the addition of these 12 lakes to the State's list, as required by EPA's Public Participation regulations (40 CFR Part 25).

Authority: Clean Water Act, 33 U.S.C. 1251 et seq.

Dated: August 4, 2010.

Acting Assistant Regional Administrator,

Notice

In accordance with Section 309(a) of the Clean Air Act, EPA is required to make its comments on EISs issued by other Federal agencies public.

Historically, EPA has met this mandate by publishing weekly notices of availability of EPA comments, which includes a brief summary of EPA's comment letters, in the **Federal Register**. Since February 2008, EPA has been including its comment letters on EISs on its Web site at: <http://www.epa.gov/compliance/nepa/eisdata.html>. Including the entire EIS comment letters on the website satisfies the Section 309(a) requirement to make EPA's comments on EISs available to the public. Accordingly, on March 31, 2010, EPA discontinued the publication of the notice of availability of EPA comments in the **Federal Register**.

NUCLEAR REGULATORY COMMISSION

[NRC-2009-0364]

Notice of Availability of Final Supplemental Environmental Impact Statement for the Moore Ranch In-situ Recovery Project in Campbell County, Wyoming, Supplement to the Generic Environmental Impact Statement for In-situ Leach Uranium Milling Facilities

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability.

SUMMARY: Notice is hereby given that the U.S. Nuclear Regulatory Commission (NRC) has published a final Supplemental Environmental Impact Statement (SEIS) to the Generic Environmental Impact Statement for *In-situ* Leach Uranium Milling Facilities (GEIS), (NUREG-1910, Supplement 1) regarding the Moore Ranch *In-Situ* Recovery Project in Campbell County, Wyoming. By letter dated October 2, 2007, Energy Metals Corporation, a wholly-owned subsidiary of Uranium One Americas (Uranium One), submitted an application to the NRC for a new source material license for the proposed Moore Ranch Project, located in southwest Campbell County, Wyoming. Uranium One is proposing to recover uranium from the Moore Ranch site using the *in-situ* leach (also known as the *in-situ* recovery [ISR]) process. In this final SEIS, the NRC staff assessed the environmental impacts from the construction, operation, aquifer restoration, and decommissioning of the proposed Moore Ranch ISR Project.

In addition to the proposed action, the NRC staff assessed the no-action alternative in the final SEIS. Under this alternative, NRC would deny Uranium

One's request to construct, operate, conduct aquifer restoration, and decommission an ISR facility at the Moore Ranch Project. Possible alternatives that were considered, but were eliminated from detailed analysis include: conventional mining (whether by open pit or underground techniques) and conventional milling or heap leach processing. However, given the substantial environmental impacts of these alternatives, they were not further considered. The NRC staff also evaluated alternative lixivants, alternative wastewater disposal options, and an alternative site location within the proposed license area. For reasons discussed in the SEIS, these alternatives were also eliminated from further consideration.

As discussed in Section 2.3 of the final SEIS, unless safety issues mandate otherwise, the NRC staff's recommendation to the Commission related to the environmental aspects of the proposed action is that the source material license be issued as requested. This recommendation is based upon (1) the license application, including the environmental report submitted by Uranium One and the applicant's supplemental letters and responses to the NRC staff's requests for additional information; (2) consultation with Federal, State, Tribal, and local agencies; (3) the NRC staff's independent review; (4) the NRC staff's consideration of comments received on the draft SEIS; and (5) the assessments summarized in this SEIS.

The final SEIS for the Moore Ranch ISR Project may be accessed on the internet at <http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1910/s1/>. Additionally, the NRC maintains an Agencywide Documents and Management System (ADAMS), which provides text and image files of the NRC's public documents. The SEIS may also be accessed through the NRC's Public Electronic Reading Room on the internet at: <http://www.nrc.gov/reading-rm/adams.html>. The "Environmental Impact Statement for the Moore Ranch ISR Project in Campbell County, Wyoming—Supplement to the Generic Environmental Impact Statement for *In-situ* Leach Uranium Milling Facilities" is available electronically under ADAMS Accession Number ML102290470. If you do not have access to ADAMS or if there is a problem accessing documents located in ADAMS, contact the NRC Public Document Room (PDR) reference staff at 1 (800) 397-4209, 1 (301) 415-4737, or by e-mail to pdr.resource@nrc.gov. documents associated with the final SEIS are also available for inspection at the Commission's PDR, NRC's Headquarters Building, 11555 Rockville Pike (first floor), Rockville, Maryland.
