Re: Export and Import Licenses XW002/05, XW008/03, IW004/05 and IW012/04
Applications currently in Timely Renewal

Dear Mr. Moore:

Diversified Scientific Services, Inc. (DSSI), a wholly-owned subsidiary of Perma-Fix Environmental Services, Inc. requests, under 10 CFR 110.20 (a)(2), the issuance of amendments for the above-mentioned specific import and export licenses to receive radioactively contaminated waste from generators in Canada for processing. Licenses IW004 and XW002 have been successfully utilized for over a decade. License Applications IW012 and XW008 have been fashioned to replicate this success.

DSSI operates an industrial boiler for the thermal treatment of pumpable mixed waste streams. DSSI is permitted to receive, store and treat mixed waste under RCRA Permits issued by the Tennessee Division of Solid Waste Management and a Radioactive Materials License issued by the Tennessee Division of Radiological Health. DSSI will conduct dedicated burn campaigns to thermally treat the original waste imported under the subject import license applications. The radioactive wastes to be imported from Canadian generators under proposed import license Nos. IW004 and IW012 is the same as the wastes approved for import under the existing licenses. Following the thermal treatment process, DSSI will return the resulting treatment residue (i.e., boiler and baghouse ash) and the empty containers used to import and transport the waste to DSSI to Canada, to the Canadian Generator of the waste, for final disposition in accordance with the applicable NRC export licenses. Therefore, none of the containers used to import Canadian liquid wastes, as well as the ash waste resulting from the thermal treatment of these wastes, will be disposed in the United States.

Thank you for your consideration in this matter. If you have any questions or require any additional information, please do not hesitate to contact me at (865) 813-1305.

Sincerely,

A handwritten signature in black ink, appearing to read "Paul M. Hickman".

Paul M. Hickman
