SUMMARY OF EXPERIENCE

Thirty-three years of nuclear Quality Assurance, Quality Engineering, and Quality Control experience in both construction and operation phases of nuclear power production. Experience includes inspection, inspection planning, auditing, development and review of operation procedures, and monitoring of corrective action systems. Fifteen years of this experience has been as supervisor of the Quality Assurance audit group (6 ½ years) and supervisor of the Quality Control inspection/examination group (8½ year). Specific responsibilities for these positions include: support of seventeen employees, development and maintenance of the group budget, interface with line management and external regulatory agencies. My most recent position was as Quality Administrator. In this position, I was responsible for coordination of the Quality Corrective Action evaluation and plan development, maintenance of the Quality Program (17.2 of the USAR), development and maintenance of Quality procedures, and various aspects of the Quality Training Program. I am currently the Ombudsman at Wolf Creek. In this position I am responsible for the Employee Concerns Program. I also participate on the STARS/USA Nuclear Safety Culture Assessment Team. I have participated in ten NSCAs and served as Team Lead for ten of the assessment. Served as Site Host for two of the Wolf Creek NSCAs. My experience in the nuclear industry has provided me with an overall perspective of what is necessary to assure the safe and reliable operation of a nuclear power plant. Additionally, this experience has enriched my interpersonal skills in the areas of management and facilitation.

EDUCATION/CERTIFICATIONS

BS – Human Resources Management – Friends University – 1995

Certified Lead Auditor

LII QC Inspector – Mech., Welding, PT, MT

EMPLOYMENT HISTORY

March 2007 to Present

Ombudsman

Wolf Creek Nuclear Operating Company (WCNOC)

New Strawn, Kansas

Specific Responsibilities:

In this position, I report directly to the President & CEO. I am responsible for maintenance and implementation of the Employee Concerns Program. This includes direct interface with the Owner Budget & Audit Committee and the handling of NRC Allegation Referrals. I participate as the alternated Team Leader on the STARS/USA Nuclear Safety Culture Assessment (Phase II) Project Team. I also participate as the Team Leader on the STARS/USA Employee Concerns Networking Team.

June 2005 to Present

Quality Administrator

Wolf Creek Nuclear Operating Company (WCNOC)

New Strawn, Kansas

Specific Responsibilities:

Coordination of the Quality Corrective Action Program issues, evaluations, and corrective action plans; Coordination of Operating Experience related to activities within the Quality Organization; Maintenance of the Quality Program currently contained in the Updated Safety Analysis Report (USAR); maintenance and development of Quality Program procedures for Audits, Procurement, Receipt, and Inspection/NDE; Development of the Quarterly Oversight Report; Administrator for the Operations Excellence Advisory Committee (the off-site review group), coordination and development of the Oversight Quarterly Station Performance Report.

September 1996 to June 2005
