Scott/Tom:

The NRC staff has reviewed your supplemental response to the Union Electric Company's request for changes to Technical Specification 3.3.2, "Engineered Safety Feature Actuation System (ESFAS) Instrumentation." Based on that review, the NRC staff has identified a need for additional information as outlined in the attached request for additional. Information (RAI).

Please review the RAI, and if you would like to discuss the RAI by a telecom, please contact Mr. James Polickoski, who is the contact for the attached RAI. Mr. Policoski can be reached by email as stated above, or by telephone at (301) 415-5430.

Thank you for your support.

Mohan
