Subject: Docket No. 40-9075

To the US Nuclear Regulatory Commission-

My name is Brian Besco, Water Operator for the Town of Buffalo Gap, Custer County, South Dakota. At a recent Town Hall meeting, we were informed of Powertech's plans for uranium removal in the area. We were informed that this company has no actual experience in this process, and that this process in itself will not be containable within the specific aquifer. We are not in favor.

The Town of Buffalo Gap has high radionuclide's in our well, and remediation is not feasible, so we have switched to a rural water system for our water needs. It is known that this experimental process can have a devastating affect on a region's water source.

It is the general consensus that the citizens of Buffalo Gap, along with the Town body, are not willing to allow Powertech, or any such company, pollute the aquifers of our region through such an extraction process.

Thank you for taking our comments.

Brian Besco
Water Operator, Town of Buffalo Gap
