SUBJECT: OPEN MEETING TO DISCUSS DECOMMISSIONING OF THE KERR-MCGEE
TECHNICAL CENTER, OKLAHOMA CITY, OKLAHOMA

Dear Mr. Larson:

This refers to the meeting conducted in the Region IV office on January 22, 1999. This meeting related to issues associated with the decommissioning of the facility located at Kerr-McGee Technical Center in Oklahoma City, Oklahoma, including the five "test-pits" and termination of License No. SUB-986. You presented information about the history and current status of facilities at the Technical Center. You described the construction and use of the "test-pits" as well as the uses in the facility laboratories. Attached are copies of documents presented by you during the meeting. Based on the information provided, it appears that this decommissioning activity will fall under Type III decommissioning. We understand that you intend to perform site characterization and develop a decommissioning plan. Further, we acknowledge that a phased approach may be required because of the need to expeditiously decommission the "test-pits" to accommodate the Oklahoma Department of Transportation's request.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter will be placed in the NRC's Public Document Room.

Should you have any questions concerning this matter, we will be pleased to discuss them with you.

Sincerely,

Ross A. Scarano, Director
Division of Nuclear Materials Safety
