Subject: Clarifications to ABC Laboratories response to apparent violations dated August 20, 2010

Dear Ms. Streit:

This is in response your questions regarding our August 20 response to two apparent violations. Your questions were regarding: 1) ABC policy as to the initiation of any future decommissioning activities; and, 2) the review and implementation of policy regarding any necessary aggressive actions that may be encountered during any future decommissioning efforts.

It is clear to ABC laboratories that any decision to undertake a decommissioning effort should only take place with the consultation and consent of the Radiation Safety Office, and should be only undertaken within the scope of advice of that office. The senior management of ABC laboratories is committed to undertake any future decommissioning only with the advice and consent of its RSO and in a manner that is compatible with our broad scope license and any applicable NUREG guidance. This policy will be reflected in a policy issued by the Radiation Safety Committee following the next regular meeting in November, and will be approved by November 30.

Regarding any necessary actions to remove contaminated equipment or building components that may be encountered during future decommissioning work, all work that may reasonably involve the exposure of workers to any additional radiological hazard that results from that decontamination or removal will be reviewed b y the radiation safety committee and the RSO, as well as any needed engineering or other expertise; a written procedure for that work will be approved by the RSO, then implemented, and any appropriate radiological post-assessment will be undertaken by ABC labs (e.g., bioassay), by the RSO. This policy will be reflected in a policy issued by the Radiation Safety Committee following the next regular meeting in November, and will be approved by November 30.

Please let me know if you have any additional questions or concerns.

Bradly D. Keck, PhD, CHP

Radiation Safety Officer
ABC Laboratories
7200 ABC Lane
