Subject: Request additional information, re: license amendment letter dtd Aug. 19, 2010.

(NOTE: This will be used as the Documents Title in ADAMS)

Licensee was contacted as part of the licensing process to verify certain items on the license.

The license included items that would require additional security measures, therefore, I called and spoke to Mr. Fox to inquire about the models, radioisotopes, and quantities of gauges that they anticipate will be possessed at any one time within NRC jurisdiction. Mr. Fox provided the gauge models and quantities expected to be used or stored in NRC jurisdiction. Mr. Fox stated that the use and storage of 30 gauges in NRC jurisdiction at any one time is sufficient authorization. Mr. Fox agreed that the maximum possession limit in Item 8 of the license should be reduced to 330 mCi Cs-137 and 1.5 Ci Am-241. All of the gauges contain Cs-137 and Am-241:Be sources.

Action Required: Document this telephone record in ADAMS under the Mail Control, License, and Docket numbers referenced above.
