Subject: NUREG-1945

Dear Nuclear Regulatory Commission:

I am writing in regards to the draft Environmental Impact Statement for the Eagle Rock Enrichment Facility proposed in eastern Idaho (NUREG-1945 draft).

This enrichment factory:

- Is unnecessary
- Poses a risk to Idaho's natural resources and people
- Should not be licensed

In particular, I am concerned that the NRC will allow Areva to start preconstruction" activities in October of 2010 - which would be before the Record of Decision is released. Moreover, preconstruction constitutes one part of a major federal

action and 40 CFR 1500.1(b) requires that information be available *before* an agency makes decisions or takes any action. The impacts of preconstruction must be evaluated in the draft EIS, or another EIS should be initiated to assess

preconstruction impacts.

Please take this concern into consideration and adjust the draft EIS accordingly. Also, please note **my adamant opposition to the licensing of the EREF.**

Yours Sincerely - Stephen Crowley
