Washington, DC 20555

Dear Commissioners:

Subject: Oyster Creek Nuclear Generating Station
Docket Nos. 50-219
License Amendment Request
Application for Environmental Technical Specification Change

Exelon Nuclear submitted the proposed change to the Oyster Creek Environmental Technical Specifications by letter to the NRC dated June 11, 2010. This proposed change would transfer responsibility for reviews and audits of compliance with Environmental Technical Specifications to an independent group as delineated in the Quality Assurance Program. Currently, this responsibility rests with the Environmental Programs Group or the Site Vice President.

The BNE has no comments on the proposed change. If you need to discuss this subject further, please contact Rich Pinney at (609) 984-7558.

Sincerely,

Patrick Mulligan, Manager
Bureau of Nuclear Engineering
