RE: NRC Possession Limits

Casey,

Secon is submitting the attached Possession limits for your review. We currently have an "open ended" license and the attached document outlines the current amount of radionuclide that we possess, as well as a small amount to accommodate future purchases.

Our company currently possesses 26 millicuries of Cesium-137 and 130 millicuries of Americium-241 in two Troxler model 3440 gauges and one CPN model MC series Portaprobe gauge. We are requesting a possession limit of 36 millicuries of Cesium-137 and 180 millicuries of Americium-241 to accommodate the purchase or replacement of one gauge as needed.

Please contact me if you have further questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Jason Bartschi", is written over a horizontal line.
