Subject: Comments on Docket ID NRC-2008-0338

I wish to provide comments on Docket ID NRC-2008-0338 - proposed revisions to 10 CFR parts 30, 31, 32, 40 and 70. The proposed rule was published in the Federal Register (75 FR 36211) on June 24, 2010.

I request that the comment period on this proposed rule be extended at least 60 days to allow the Organization of Agreement States and other individual states the opportunity to better understand the scope of this rule and the potential impact. This proposed rule should be reviewed by state individuals with experience in the sealed source and device review/registry process to determine the overall impact on agreement states, and generate the most informed response to the NRC questions in the proposed rule. The proposed class exemption for industrial products in 10 CFR 30.20 also requires further analysis to determine the impact on agreement state regulation of generally licensed devices potentially subject to the class exemption.

I hope these comments may still be considered. Thank you for the opportunity to comment.
