| 5. Were the meeting starting time, duration, and location reasonably convenient? | | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 6. Were you given sufficient opportunity to ask questions or express your views? | | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| 7. Are you satisfied overall with the NRC staff who participated in the meeting? | | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

concerns like this speaker will stack in your favor ...

COMMENTS OR SUGGESTIONS:

Sounds like a done deal no matter my comments. Thank you for answering these questions.

110 uranium enrichment facility at site. Id Falls by AREVA !!! The transport of radioactive materials + the storage of nuclear waste are my biggest concerns. There are safety issues! We will be at risk. How will the waste be disposed of? Snake River Alliance did an excellent job explaining. NRC sounded like bureaucratic babble ignoring the real dangers + concerns. How is this really going to help US live in Idaho, USA?! *Continue Comments on the reverse.*

COMMENTS OR SUGGESTIONS:

Thank you for answering these questions.

I very much appreciate having a public meeting in Boise. This proposed project would have a profound impact on Boise and all of Idaho

I am concerned that it appears people from Idaho Falls who testified in Boise might be given time in Idaho Falls as well at that public meeting.

If that was the case, I do not appreciate them being ~~at~~ given preference and allowed to testify first in Board.

One opportunity to testify is great - thank you!

COMMENTS OR SUGGESTIONS: *August, 2010* Thank you for answering these questions.

I was not satisfied that the public received correct or true information or that the public had full opportunity to express their concerns. Because of the timing, after the hearing, and lack of information as presented by the officials. Presentation of the EIS was very inadequate. It was completed only last month (July 2010). There was little opportunity given for questioning prior to testimony why were exemptions for pre-construction activities given prior to licensing. I am concerned also about what resources

(provided by Idaho taxpayer)

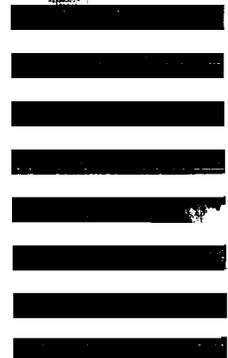

eg. land/water/energy/raw materials will be used? The most glaring operations not addressed or answered concerned the transportation risks, and ultimate unresolved problem of waste disposal. No mention was made of potential contamination of the aquifer, or mention made of the location of the Snake River. Also, there was too much early time in the hearing allotted to elected & other officials out of the Basin area. My most serious concerns were around the EIS - and why no details were given for impacts of construction, operation, or decommissioning of the proposed EREB.
