Little Rock, Arkansas 72204

SUBJECT: LICENSE AMENDMENT

Please find the attached Amendment Number 07 License Number 03-25880-01. The NRC has established that all materials licenses should have maximum possession limits listed on materials licenses as recommended by the Materials Program Working Group (MPWG) of the Office of Federal and State Materials and Environmental Management Programs (FSME). Previously, your license had an "open ended" possession limit described in Item 8 of your materials license. **The attached amendment contains a "closed ended" possession limit, which specifies the maximum amount of activity per source and total activity allowed for each radioisotope on the license.** If you have any questions, or if the amendment of your license does not accurately document the amount of material that you possess, please call or email me at (817) 860-6590 or michelle.simmons@nrc.gov to amend the license, as appropriate.

In accordance with 10 CRR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation.

Sincerely,

/RA/

Michelle Simmons, Health Physicist
Nuclear Materials Safety Branch B
