Phone: (330) 208-1172

Desc: I seek records that detail the type, manufacturer, brand name, and asbestos content of any and all gasket material authorized for use in the construction of Three Mile Island Nuclear power plant, Unit One (TMI-1) -- specifically those gasket materials authorized for application on piping systems located within the turbine building at TMI-1.

Other references I have obtained through the public reading room indicate that this information may be contained in the Preliminary Safety Analysis Report submitted to the NRC by Metropolitan Edison in 1966-67 at Volume 2, Section 10 -- and also in the Final Safety Analysis Report submitted to the NRC in 1973-1974.

I am also seeking timelines and/or reports on the progress of the construction of TMI-1 between 1968-1974 showing when the construction of the turbine building for TMI-1 was commenced and when it was completed.
