Subject: Comanche Peak

Mr. Willingham,

We moved to Granbury seven years ago and invested all of our equity in a home on Lake Granbury. Anything that affects the beauty and quality of Lake Granbury literally affects our financial future.

Meanwhile, we understand that the NRC's Draft Environmental Impact Statement (DEIS) concludes that there are *no environmental impacts that would preclude issuing permits for two additional reactors* (Comanche Peak 3 and 4) at Luminant Energy's Glen Rose facility (italics added). Obviously, the definition of "environment" is far too narrow for the real impact on Lake Granbury. Indeed, our environment is our quality of life and any action that will reduce the water levels, recreational usage and beauty of Lake Granbury directly impacts that environment.

Please consider the comments, requests and ideas of those of us who live, work and play on Lake Granbury before granting Luminant its request. Indeed, Luminant has already begun purchasing full page newspaper advertisements to support its position. Individuals like us can only compete with their kind of financial and political power by appealing to those who we hope will protect the interests of the public, not the just the corporations and lobbyists. We appeal to you.

Thank you for listening and see you tomorrow in Glen Rose.
